N2

Started on	Saturday, 1 August 2026, 11:00 AM
State	Finished
Completed on	Saturday, 1 August 2026, 11:11 AM
Time taken	11 mins 23 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using the counter method.

```
void function (int n)
{
    int i= 1;
```

```
    int s =1;
```

```
    while(s <= n)
    {
         i++;
         s += i;
     }
}
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

For example:

Input	Result
9	12

Answer: (penalty regime: 0 %)

```c
#include <stdio.h>

void function (int n)
{
    int i= 1;
    int s =1;
    int counter = 0;
    counter = counter + 2;
    while(s <= n)
    {
        counter = counter + 1;
        i++;
        counter = counter + 1;
        s += i;
        counter = counter + 1;
    }
    counter = counter + 1;
    printf("%d",counter);
}

int main(){
    int n;
    scanf("%d", &n);
    function(n);
    return 0;
}
```

	Input	Expected	Got	
✔	9	12	12	✔
✔	4	9	9	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.

Started on	Saturday, 1 August 2026, 11:12 AM
State	Finished
Completed on	Saturday, 1 August 2026, 11:25 AM
Time taken	13 mins 31 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using the counter method.

```
void func(int n)
{
    if(n==1)
    {
      printf("*");
    }
    else
    {
     for(int i=1; i<=n; i++)
     {
       for(int j=1; j<=n; j++)
       {
          printf("*");
          printf("*");
          break;
       }
     }
   }
 }
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer: (penalty regime: 0 %)

```
#include <stdio.h>

void func(int n)
{
    int counter = 0;
    if(n==1)
    {
        counter = counter + 1;
        //printf("*");
        counter = counter + 1;
    }
    else
    {
        counter = counter + 1;
        for(int i=1; i<=n; i++){
            counter = counter + 1;
            for(int j=1; j<=n; j++){
                counter = counter + 1;
                //printf("*");
                counter = counter + 1;
                //printf("*");
                counter = counter + 1;
                break;
            }
            counter = counter + 1;
        }
        counter = counter + 1;
    }
```

```
    printf("%d",counter);
}

int main(){
    int n;
    scanf("%d",&n);
    func(n);
    return 0;
}
```

	Input	Expected	Got	
✔	2	12	12	✔
✔	1000	5002	5002	✔
✔	143	717	717	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.

Started on	Saturday, 1 August 2026, 11:25 AM
State	Finished
Completed on	Saturday, 1 August 2026, 11:39 AM
Time taken	13 mins 16 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using counter method.

```
Factor(num) {
{
   for (i = 1; i <= num;++i)
   {
    if (num % i== 0)
       {
         printf("%d ", i);
       }
    }
 }
```

Note: No need of counter increment for declarations and scanf() and counter variable printf() statement.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer:

```c
#include <stdio.h>

void Factor(int num){
    int counter = 0;
    for (int i = 1; i <= num;i++){
        counter = counter + 1;
        counter = counter + 1;
        if (num % i== 0){
            //printf("%d ", i);
            counter = counter + 1;
        }
    }
    counter = counter + 1;
    printf("%d",counter);
}

int main(){
    int num;
    scanf("%d",&num);
    Factor(num);
    return 0;
}
```

	Input	Expected	Got

Started on	Saturday, 1 August 2026, 11:39 AM
State	Finished
Completed on	Saturday, 1 August 2026, 11:44 AM
Time taken	5 mins 24 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using counter method.

```
void function(int n)
{
    int c= 0;
    for(int i=n/2; i<n; i++)
        for(int j=1; j<n; j = 2 * j)
            for(int k=1; k<n; k = k * 2)
                c++;
}
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer:

```
#include <stdio.h>

void function(int n)
{
    int counter = 0;
    int c= 0;
    counter = counter + 1;
    for(int i=n/2; i<n; i++){
        counter = counter + 1;
        for(int j = 1; j < n; j = 2 * j){
            counter = counter + 1;
            for(int k = 1; k < n; k = k * 2){
                counter = counter + 1;
                c++;
                counter = counter + 1;
            }
            counter = counter + 1;
        }
        counter = counter + 1;
    }
    counter = counter + 1;
    printf("%d",counter);
}
int main(){
    int n;
    scanf("%d",&n);
    function(n);
    return 0;
}
```

N2

Started on	Saturday, 1 August 2026, 11:45 AM
State	Finished
Completed on	Saturday, 1 August 2026, 11:47 AM
Time taken	2 mins 32 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using counter method.

```
void reverse(int n)
{
   int rev = 0, remainder;
   while (n != 0)
    {
        remainder = n % 10;
        rev = rev * 10 + remainder;
        n/= 10;

    }
print(rev);
}
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer:

```c
#include <stdio.h>

void reverse(int n)
{

    int counter = 0;
    int rev = 0;
    counter = counter + 1;
    while (n != 0)
    {
        counter = counter + 1;
        int remainder = n % 10;
        counter = counter + 1;
        rev = rev * 10 + remainder;
        counter = counter + 1;
        n/= 10;
        counter = counter + 1;

    }
    counter = counter + 1;
    //print(rev);
    counter = counter + 1;
    printf("%d",counter);
}

int main(){
    int n;
    scanf("%d",&n);
    reverse(n);
    return 0;
}
```
